7. Steering Advisory Committee

The LACRIS steering committee met on May 13, 2026, in the LACRIS Computer Lab at the Los Angeles County Biometric Technology Center (BTC).

The Steering Committee participants were briefed on the status of LACRIS systems and ongoing projects.

8. General Updates

The Mobile Booking Truck (MBT) is in the final outfitting stages by LACRIS for deployment. LAPD Traffic Division took a tour of the Truck and are eager to deploy it on DUI checkpoints.

The Automated Biometric Identification System (ABIS) RFP is on schedule with vendor demonstrations which are scheduled to conclude today, 07/23/2026.

Staffing – LACRIS currently has staff vacancies that we have been working to fill. All of which are RAN Board approved items.

- One Deputy Sheriff
- Three Help Desk items
- One IT Systems Analyst

Procurement –The County is currently experiencing fiscal constraints. Fortunately, LACRIS is unique in that our funding comes from the State, and we are not facing the same fiscal issues of the County. Due to the County's fiscal status, there have been changes to the purchasing processes within LASD. These processes have negatively impacted LACRIS despite LACRIS being special funded.

Travel/Training –LACRIS staff attends numerous biometric and law enforcement conferences throughout the year. LACRIS also funds travel and training for our member agencies and their personnel. These conferences are vital to the biometric community and ensure we are deploying state-of-the-art biometric systems, as well as properly trained personnel.

IV. **ACTION ITEMS**

A. Authorization for Funding Approval for LACRIS to purchase replacement network switches and firewalls for the PAC-50 network.

The PAC-50 network is the connectivity backbone for biometric identification in the County. The existing Cisco core switches and firewalls have reached or are nearing the manufacturer's End-of-Life (EOL). Access to vendor support, hardware replacement, software updates, and critical security patches is either

limited or unavailable. Ongoing reliance on outdated equipment elevates the risk of service disruptions, cybersecurity vulnerabilities, and prolonged recovery periods, directly affecting more than 119 partner agencies that depend on the PAC-50 network for access to LACRIS solutions, the DOJ, and the FBI.

The updated network infrastructure will eliminate the current single point of failure within the PAC-50 network. Utilizing an "active/active failover" protection is the first step in preventing unnecessary downtime should maintenance or unforeseen circumstances occur.

This funding authorization will enable the replacement of four (4) Cisco firewalls and sixteen (16) Cisco Nexus 9300 switches, encompassing all necessary hardware, software, support, and maintenance at an estimated cost of \$810,000.

Public Comment

There were no members of the public present.

ACTION:

THE ITEM WAS MOVED BY BRIAN COSGROVE, AND SECONDED BY BRIANE GREY, APPROVED BY A MAJORITY, WITH ONE ABSTENTION, TO PURCHASE THE REPLACEMENT OF THE PAC-50 NETWORK SWITCHES AND FIREWALL FOR A COST OF \$810,000.00.

V. ADJOURNMENT

The meeting was adjourned at 2:42 p.m. The next meeting is scheduled for September 24, 2026, at the Hall of Administration.
